

# FAST FOLD PROJECTION SCREEN

foldable, available in 120" and 150"

Lightweight and sturdy projection screens, easily transportable, whose structure made of anodized aluminum is lightweight yet stable and rigid; the couple of uprights is fixed to the frame with simple knobs. The package includes a blank canvas for front projection without welding on the projection surface, which is fixed to the structure with simple snap buttons, a rear projection canvas with the same features, a carrying bag. The structure has a height varying from 80 to 120 cm from the ground at the base of the screen and ensures maximum stability in the face of extreme ease of assembly and disassembly.

## Technical features

- SOFT WHITE and RETRO projection screens
- Frame in extruded anodized aluminum
- Variable height from 80 to 120 cm from the ground to the base of the screen
- The screen is attached to the frame by snaps hooked on the front of the structure ensuring perfect flatness & quick assembly
- Stands: all the FAST FOLD screens are provided with a pair of uprights if the screen cannot be installed on the wall. The uprights are height-adjustable in order to facilitate the vertical positioning of the screen.
- Soft bag for transport
- Heights are based on screens supplied with folding frame, uprights floor folding, SOFT WHITE screen for front projection with black border, RETRO screen for rear projection
- Strong cardboard volcano type package
