Eight Features (GPCK-MA Series)

1. Double Positioning System provides safety and convenience to users. The safety positioning of motor is set by factory, and the height of stopping can be adjusted automatically by electric positioning.
2. Automatic Balancing Mechanism ensures the dragline and suspending cage vertically when extending or retracting, avoid any digression or noise caused by the slant of the dragline.
3. The Brake Mechanism is designed when the dragline is broken, the motor brake is out of control or the steel cable loose accidentally, the safety device will operate automatically and prevent the falling of case and improve the security in high-ceiling condition.
4. High-Strength Aluminum Linkage is die-casting and with excellent texture, high-strength and rustproof, very light and it can reduce the lift-weight and keep the balance.
5. Completed Protection prevents the projection equipment against the impact of external environment, and avoid the leakage of the cool air.
6. Ornament Baffle matches perfectly with different types of ceiling, when extending the case, it may completely cover the hatch that occurs.
7. Cable Management, which is allocated for the users to put Power cord, VGA, RGB or HDMI cables inside, easily bend and stretch, customized size are available.
8. Multi-Control Systems are available (RF Remote Control, RS232/485, Wall-Switch)

Scope for installation (Installation hole of projector):  
Maximum scope for installation: 345mm diameter  
Minimum scope for installation: 45mm diameter
