emotion

LINEA ARIES

Elegant installation frame screens.

The rounded profile towards the inside is painted with a matte finish.

The black nylon corners are finished in the same way and are indistinguishable from the frame.

The perimeter groove and the accessories supplied allow wall mounting or screen suspension from above.

No ripples or folds!

The canvases are edged with a soft PVC profile which, disappearing behind the frame, effectively stretches the canvas at every point, eliminating any kind of undulation or bending.

TECHNICAL FEATURES

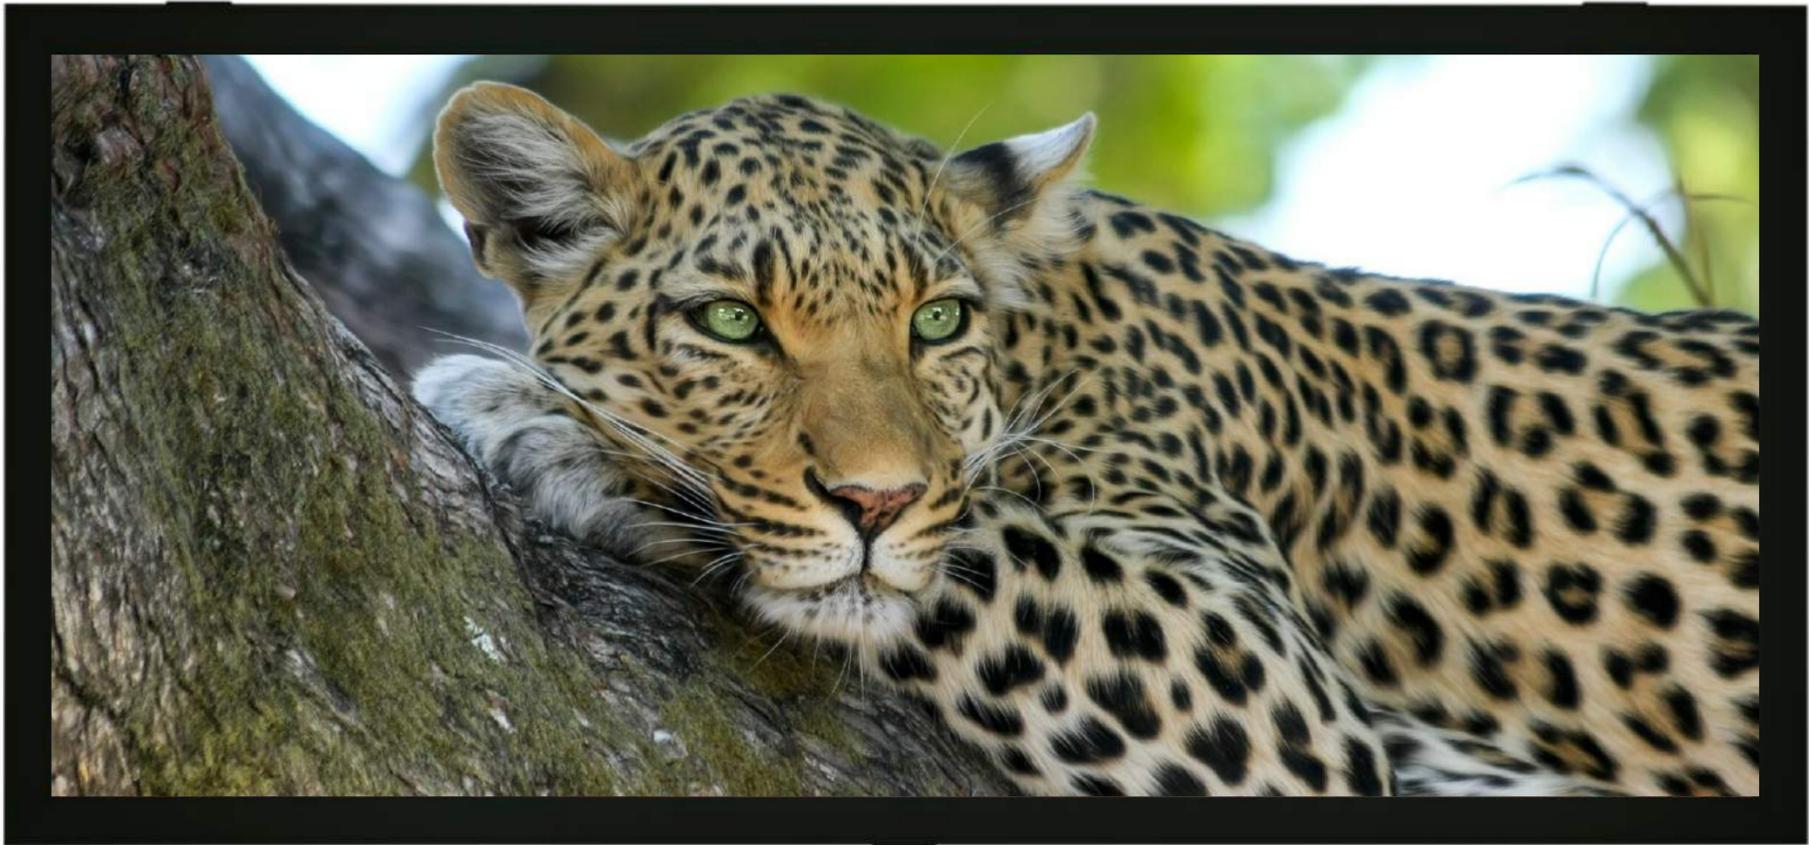

- **ELEGANT ROUNDED
PROFILE**
- **AVAILABLE LED
DECORATION

THE CANVAS

FRONT ICEBERG

Surface in white PVC.
It's a B1 certified high-reflectance fire retardant canvas, used for frontal projections. It allows images of extraordinary brightness and definition even in difficult environmental conditions.

Light gain: 1.2
Vision corner: 150°
Certification: B1

RETRO PROJECTION MIRROR

PVC surface. It's a certified M1 canvas of the fire-retardant type with high reflectance and is used for retro projections.

Light gain: 1.9
Vision Corner: 150°
Certification: M1

GREY HIGH CONTRAST

PVC surface.
It's a M1 certified high-reflectance fire retardant canvas, used for frontal projections. The gray tone optimizes contrasts.

Light gain: 0.8
Vision corner: 150°
Certification: M1
